Applicant is aware that they must provide an adequate easement and drainage improvements to an adequate outfall without adversely affecting existing conditions (the applicant's engineer should fully review drainage design requirements in the subdivision regulations). In most cases the applicant must provide mitigation for increased run off, fill and other impacts (i.e. on site detention or other means.). Public roads can not be routed thru private detention areas.

Minimum lot sizes are required by the Galveston County Health District for subdivisions with septic and/or water wells.

All subdivisions require the filing of a plat and compliance with the County's Subdivision Regulations before work begins.

Applicant is fully aware of the County Subdivision regulations and the requirements for paving, drainage & testing, and inspection.

All road and drainage construction materials must be pre-approved and inspection and testing must be coordinated with the county inspector before the work begins.
